Experience

Company:	Clascal (Toronto), http://clascal.com/
Post:	Web-developer (more front-end, less back-end)
Period of work:	18.10.2016 – 12.07.2019

Technology stack: PHP (Codeigniter), JS (jQuery, Ajax), HTML/CSS, GIT

This is a platform for publishers of newspapers and advertisers. Advertisers can order online ads here on the central site and on the local newspapers sites of publishers. Publishers can place here his website or create it. There are three side of the systems: 1) main dashboard for publishers and advertisers, 2) main Clascal site with international ads in English language, 3) and plugin for WordPress website for order ads directly from local newspaper sites.

The most of my role in this project is front-end, and some of back-end too.

Responsibilities:

- Editing design of the all system and make it one styled (JPG to HTML/CSS)
- Support WordPress plugins
- Making the new features of system.

I can ask a reference letter.
